

CRITIQUE - STAYBEHIND #4

1. The very specific and well-organized "Staybehind Manual" prepared for this course is the best I have seen in the ATD. The Chief Instructor kept repeating that the Manual would be rewritten, but I see no immediate need for it.
2. The Chief Instructor contacted each student personally the week before the course started and gave each student a copy of the course schedule and an opportunity to receive materials early. I think this is a practice that could be adopted by other ATD courses.
3. Fully aware of the priority established for Western Europe and the "hot war" possibilities, I still feel that more emphasis should be given to the coup d'etat situation in other divisions or regions.
4. The guest lecturers in this course were particularly good-- their presentations were all excellent and germane to the topic.
